No Sew Fleece Blanket

You will need:

Polar Fleece: 1 1/2 to 2 yard piece (Fleece is usually 50-60" wide)

Ruler or Shape Cut Ruler and Rotary Cutter: Works best to create neatly cut fringe. If you are using scissors, make sure your cuts are clean, even, and straight with no frayed edges.

This blanket is simply made in 5 easy steps. Please wash all blankets before delivery to the hospital.

Step #1: (Fig. 1)
Before you begin, trim off selvage edges (rough edge w/ writing and no print) and square uneven edges.

step #2: (Fig. 2)
Cut a 3" square from each corner of the fleece.

step (Fig. 3)
Cut 3" x 1" wide fringe around blanket

Figure 1

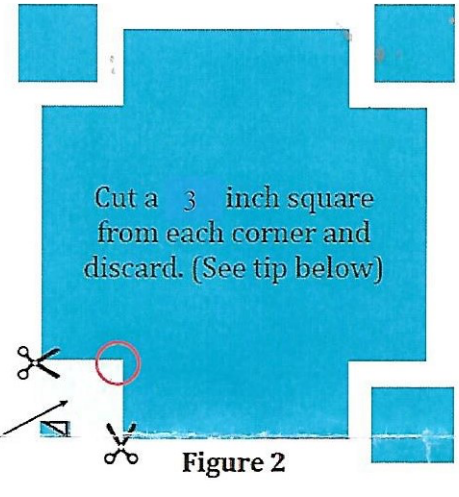

Figure 2

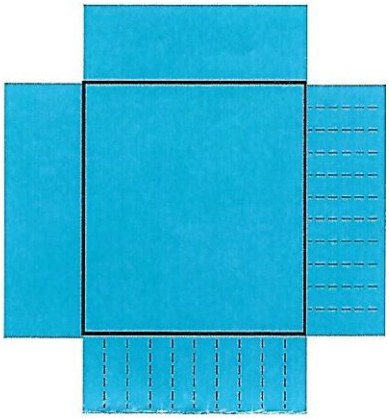

Figure 3

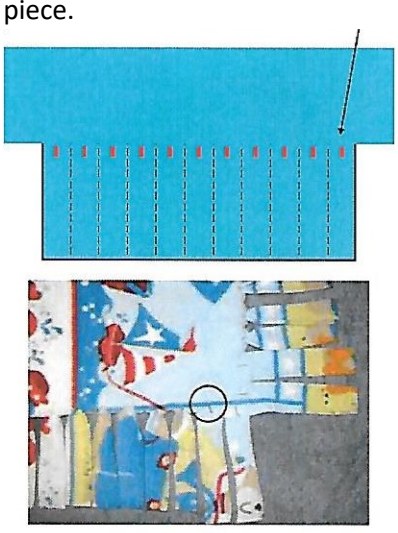
Tip: Cut a 3" piece of fabric or batting to use as your corner template. (Fig. 2) It won't slip and will make cutting easier.

Using your ruler and rotary cutter vertically and horizontally (arrow) ALMOST to the corner (red circle) but NOT QUITE. Then use your scissors to finish the corner cut. This will give you a crisp, clean cut and you won't cut into the neighboring fringe.

Step #4:
Using a seam ripper, make a tiny slit at the top of each fringe piece.



Step #5:
Feed the end of the fringe through the back side of the slit you just cut and pull through to create a neat and secure fringed end.

Approved Sizes:
45" x 60"
72" x 60"
