Testimonials

Before Hip Replacement, the only exercise I did was to lift my fork. As a result I blossomed to over 250 pounds. After surgery, as part of my Rehabilitation program, I was told to walk at least 30 minutes a day. It wasn't easy in the beginning, but the more I walked the better I felt. After three months I was amazed to discover I felt good.

I continued to walk 15 min in the morning and evening. In bad weather I just walk around the dining room table. I don't have a treadmill. While walking I can plan my day, listen to music, or even talk on the cell phone. This is the age of multi-tasking. continue to lose weight and feel good. Do yourself a favor-walk.

Megan -Cass Co Extension Homemaker

The time came when I could no longer put off taking charge of my health. My blood pressure was high. I was gaining weight, my energy was not what it used to be, and I was not sleeping. I began to worry about where my unhealthy life style was taking me. Taking charge and doing some research helped me to make some decisions to change what I was eating and my "Couch Potato" life style. I began to eat more Fruits and Vegetables, look at what was in my food with regards to Salt and Fats. After six weeks of walking each day I began to see a difference. Now seven months later I have lost 30 pounds , sleep better and have a better attitude. My blood pressure is at near normal levels. I walk each day with no excuses giving me time to spend with my Wife, reconnecting and talking about our day. I now have more energy to play with my grandchildren too.

Ray -Miami County

FOCUS ON THESE

Purpose:

Create healthy habits
For you & your Family

Activites:

Walking

It does not have to be planned

Mix the batter by hand

It burns Calories

Walk the Dog (s)

Let him walk you!

Hula Hoop

Knees, Hips, & Arms get a work out

Do the Bunny Hop

Do things with a “Buddy”

Park at the end of the Parking Lot

No Dings in the Car

SUGGESTED RESOURCES
